DNA TEST FOR PROGRESSIVE RETINAL ATROPHY (*cord1*)

Registered Name: Springfield\s
Registration Number: SHSB 716016
Microchip/Tattoo Number: 276097202116417
Breed: ENGLISH SPRINGER SPANIEL

This dog is CLEAR of the *cord1* mutation

Authentication code: AC6752998

Explanation of terms:

This dog has 2 copies of the normal gene and will neither develop the form of PRA caused by the *cord1* mutation, nor pass this mutation to its offspring. English Springer Spaniels with two copies of the *cord1* mutation (i.e. genetically affected) are significantly more likely than other English Springer Spaniels to become clinically affected by *cord1* PRA during their lifetime. This test only detects the form of PRA caused by the *cord1* mutation; it does not detect any other forms of PRA that may be present in English Springer Spaniels.

Result authorised by: Dr. N. G. Holmes (Genetic Services Manager)

Sample received: 06/10/2014

Sample tested: Swab

Test completed: 15 October, 2014

Client: Theres Schmid

Address: im Aulig, Uesslingen, Switzerland, CH-8524, United Kingdom

Result only applies to sample supplied
